

QScrollArea

```
classDiagram
    class QScrollArea
    class DoLah_DisplayArea["DoLah::DisplayArea"]
    DoLah_DisplayArea --|> QScrollArea
```

The diagram shows a class hierarchy. At the top is the 'QScrollArea' class, represented by a rectangle divided into three horizontal compartments. The top compartment contains the class name. Below it are two empty compartments. A blue line with an open triangular arrow points from the 'DoLah::DisplayArea' class to the 'QScrollArea' class, indicating inheritance.
